

ALBERTA TEACHERS' ASSOCIATION LOCAL #55
PROFESSIONAL DEVELOPMENT COMMITTEE
Invite you to attend a workshop on...

Learning With the Brain in Mind. Boys vs Girls.

Jensen (2005) reminds us that teachers must be experts on the organ they teach—the brain! The more we educators understand the brain, the better able we are to design instruction to match how our students learn best. Knowledge about brain development and function allows teachers to make informed decisions about teaching practice related to learning. Is testing good for the brain? How should a lesson be structured to achieve maximum learning and recall? What effect does physical activity have on learning? How are diet, gender, music training, sleep and stress connected to learning? Participants will explore a range of topics related to the differences between boys and girls brain and learning and discover how to develop teaching strategies that engage students' brains.

Audience: Teachers K-12

Wednesday
May 16th, 2018
4:15 – 6:00 pm

Light snacks will be
provided

Location:
ATA Local 55 Offices
Suite 213
3016 5th Ave NE, Calgary
